AREAS OF CONCENTRATION

Consumer Finance

Data Privacy

False Advertising

RELATED CAPABILITIES

Antitrust & Competition

Class Certification

Edgeworth's consumer protection experts support clients facing allegations related to false advertising, product liability, data privacy, and consumer financial protection across all stages of litigation—from assisting with discovery, to providing economic analyses related to class certification and assessing potential damages at trial.

Our work includes both class action and individual action litigation support related to alleged product misrepresentation, product mislabeling, labeling omissions, product defects, cyberattack liability, release of sensitive and personally identifiable information in a data breach, inappropriate determination of product payments, improper overdraft fees, unauthorized fee-based program changes, and hidden lending fees.

We utilize our experts' decades of professional experience analyzing economic and econometric issues in bet-the-company litigation to study claims of economic injury and damages across a broad range of industries, including consumer products, pharmaceuticals, financial services, transportation, manufacturing, technology, communications, nutritional supplements, and food products.

CASE HIGHLIGHTS

Class Certification Denied in Matter Alleging Misrepresentations and Omissions in Packaging Litigation, 04.22.2022

Class Certification Denied in Auto Insurance Payments Matter Litigation, 02.11.2022

Class Certification Denied on Predominance Issues Related to Plaintiff's Damages Model Litigation, 08.14.2019
