EDUCATION

Matthew Milner received his MBA from The George Washington University School of Business and his BA in economics and political science from Hobart College.

Matthew Milner is a co-founder and partner of Edgeworth Economics. As a professional economic consultant, he assists counsel and corporations with extracting, transforming, and analyzing large transactional databases for use in litigation, criminal investigations, and public policy and regulatory matters, bringing economic and econometric expertise to matters in antitrust damages and class certification. Mr. Milner seeks to make the issues related to data management and complex analyses simple and easily understood by clients, judges, and jurors alike. In managing his practice, Mr. Milner focuses on providing quality work and clear communication, responsive and attentive client service, and concrete project plans and budgets.

In antitrust litigations, Mr. Milner works with individual clients and joint defense groups to build and analyze complex data from SAP, Oracle, and legacy systems. Mr. Milner manages data collections across companies internationally, developing sophisticated empirical models while effectively communicating their results in a sensible and straightforward manner. Mr. Milner constructs and analyzes data to support economic testimony for mediation clients and serves as a consulting data expert for joint defense groups in antitrust litigations and criminal investigations.

Mr. Milner brings his data management expertise to analyze economic issues in class certification matters in a variety of contexts, including antitrust and labor matters. He works effectively with counsel and companies to identify appropriate databases and variables across products, divisions, and companies as required during the discovery process. Mr. Milner also coordinates the turnover, cleaning, database construction, and econometric analysis pertinent to expert testimony in high stakes litigations.

Mr. Milner's experience spans a host of industries, including agriculture products, high technology goods, retail consumer products, and wholesale distribution. He has worked on litigation matters before state and federal courts and antitrust agencies in the United States, Canada, Europe, and Asia, and regularly consults for Fortune 500 businesses.
